

I am respectfully urging the member of the FCC to reject the NAB petition 04-160. As a listner in the Detroit DMA we do not have a classical station and XM radio provides a wonderful list of varied formates. Weather and traffic is important to all listners and is one of the features that interested me in the XM product. Please do not return to the early days of radio but look to the future. The local station must learn to compete.Regards,
Alfred John Hoffman
